

Once a week we collect waste from your home. The calendar shows the type of waste we collect during the week concerned. Household waste is sorted into four categories: refuse, glass and metal packaging, paper/cardboard/cartons, and household plastic. Household plastic must be delivered for collection in a special bag that is hung on a yellow hook on the bin for paper/cardboard/cartons. Sorting waste is necessary to make space for normal household

waste. We will not collect any waste placed outside of the bins. On collection day, the waste bin must be placed a maximum of 5 metres from where the waste collection vehicle stops. Snow must be removed so that it is easy for those manning the vehicle to move the bin. Sand etc. must be strewed when it is icy.

This is the equipment everyone should have. The red box is for collection of hazardous waste such as batteries, paint, light bulbs and small electronic devices. When the box is full, take it to your local waste reception station. If you are missing some of this equipment, contact us.

All other waste may be delivered free of charge to your local waste reception station. Examples of this are furniture, large cardboard packaging, metal, electrical products, construction waste, garden waste etc., and hazardous waste such as paint, batteries, and light bulbs etc.
